

软约束：通过惩罚项间接满足边界条件

边界条件可能略有误差

硬约束：通过结构设计自动满足边界条件

$$u(0) = 0 \times (1 - 0) \times \text{NN}(0) = 0 \quad \checkmark$$

$$u(1) = 1 \times (1 - 1) \times \text{NN}(1) = 0 \quad \checkmark$$
